

Can I use outdoor power supply when I go to Milan Italy

Overview

Italy runs on 220V - 230V* and 50mHz, while the US and Canada standard is 120V and 60mHz. *The standard is 220V, but there's a +/- 10% leeway, which is why you'll often hear. Not only do electric outlets in Italy have a different voltage than the US and Canada, but the actual sockets (outlets) are also different. And to complicate things, we have multiple. If your electronic device doesn't work with 220V or 230V, you'll need to purchase a power converter (aka voltage converter) if you want to use it in Italy. The power converter does what it says it does - converts the power from the higher Italian voltage to the lower. For almost all electric devices, the Type C (2-pin) adapter will work! This is the adapter I travel with in Italy, and I use it for my iPad, laptop. Here's a list of some electronics you may want to bring to Italy. Be sure to check the device or user's manual to find out if you can use it with just a.
