Is hjt a photovoltaic panel

Overview

Heterojunction solar panels work similarly to other PV modules, under the photovoltaic effect, with the main difference that this technology uses three layers of absorbing materials combining thin-film and traditional photovoltaic technologies.

Heterojunction solar cell

OverviewHistoryAdvantagesDisadvantagesStructureLoss mechanismsGlossary

Heterojunction solar cells (HJT), variously known as Silicon heterojunctions (SHJ) or Heterojunction with Intrinsic Thin Layer (HIT), are a family of photovoltaic cell technologies based on a heterojunction formed between semiconductors with dissimilar band gaps. They are a hybrid technology, combining aspects of conventional crystalline solar cells with thin-film solar cells.
