

London restricts solar glass

Overview

Solar control glass consists of layers of special material on the glass, invisible to the eye, which repels solar heat but lets the sunlight in. This major energy saving benefit, in hot conditions, reduces the need for cooling systems.

Article Content

Solar Control Glass | Olympic Glass

In the scorching heat of summer, our solar control glass acts as a barrier against heat gain, helping to keep your interior cool and pleasant. Conversely, during

Everything You Need to Know About Solar Control Glass

It works by reducing the solar factor or G-value of the glazing. This is the percentage of solar energy that penetrates through the glass into the interior

Solar Control Glass Explained

Solar control glass is specially designed to reduce solar gain and if combined with a low-e glass it can also retain heat in cooler months for perfect climate control.
