

Nassau Solar Energy Storage System

Overview

The Islands Energy Program team hasn't found an instance yet “where importing natural gas, diesel, propane or other fossil fuel for power generation is cheaper than the combination of solar plus storage or other renewable energy systems,” Burgess highlighted. “Solar really is the. Three pillars support the program. The first is strategic planning that enables island governments, private and public-sector enterprises to undertake national clean energy transition. Those characteristics led Shell to propose investing very large sums of capital to build out a 220-250-MW natural gas power plant. “It's still early days. There's no PPA [power.
