

Pay attention to the direction of the photovoltaic panels when installing them

Overview

South-facing solar panel systems almost always generate the most electricity, but east-west roofs can work well for solar, too. The direction is more important than the angle. Angle is rarely a make-or-break factor, and most roof tilts will work fine—though there are some.

Best Direction for Solar Panels to Maximize Savings — SolarReviews

Best Solar Panel Direction For Every Goal Best Solar Panel Direction Overall South to Southwest Is Best For You Rates How Much Does Solar Panel Direction Impact output? What If Your Roof Doesn't Face South? Does Solar Panel Angle Matter? How to Calculate Output on Your Roof Based on Its Direction It's important to have your panels facing a certain direction to get the best output percentage - but what about the angle at which they're placed? The performance of solar panels is affected by their angle of inclination. To extract maximum power from a PV system, you would have to adjust the angle based both on latitude and season. In real situat... See more on solarreviews
